

Plesk-18.0.32.2 CentOS 8.2 64 位

【商品介绍】

操作系统版本：CentOS 8.2 64 位

Plesk 版本：18.0.32.2

【功能亮点】

所有软件均使用官方下载地址，请放心使用；服务和实例均已配置重启自动启动。

【产品说明】

1. 服务器账户信息：CentOS 系统默认管理员账户为 root，默认密码为新购云主机设置的密码，如需重置密码请登陆阿里云管理控制台，如图所示，找到左侧菜单栏【云服务器 ECS】

提交之后重启实例即可。

2. 默认防火墙是关闭的

【系统登录】

本地个人电脑安装 Xshell 或者 CRT SSH 远程连接工具，

一、安装步骤

- wget autoinstall.plesk.com/plesk-installer
- chmod u+x plesk-installer
- ./plesk-installer
- 页面访问：IP 地址

```

      Congratulations!

The installation has been finished. Plesk is now running on your server.

To complete the configuration process, browse either of URLs:
  * https://affectionate-euclid.101-200-120-88.plesk.page/login?secret=SGqHUMQlCFHe09B1KhAk0rQ7sHeWZErZcEjqqmMuvHFiorKg
  * https://172.17.143.16/login?secret=SGqHUMQlCFHe09B1KhAk0rQ7sHeWZErZcEjqqmMuvHFiorKg

Use the username 'admin' to log in. To log in as 'admin', use the 'plesk login' command.
You can also log in as 'root' using your 'root' password.

Use the 'plesk' command to manage the server. Run 'plesk help' for more info.

Use the following commands to start and stop the Plesk web interface:
'service psa start' and 'service psa stop' respectively.

If you would like to migrate your subscriptions from other hosting panel
or older Plesk version to this server, please check out our assistance
options: https://www.plesk.com/professional-services/

The changes were applied successfully.
