

详见接口文档，如有问题，可随时联系：19703652852

The screenshot displays an API testing tool interface for the endpoint `GET /api/id_cardcheck`. The interface is divided into several sections:

- API 调试** (API Debug): Includes a sidebar with navigation options like **商品介绍**, **商品价格**, **服务商**, and **用户评论 (1857)**. A red arrow points to the **API 调试** tab.
- API** (API): Shows the endpoint `GET /api/id_cardcheck` and a **发起请求** (Send Request) button. Below this, there are sections for **请求参数 (Header)**, **请求参数 (Query)**, and **请求参数 (Body)**. The **请求参数 (Query)** section contains two fields: `* name` (required) and `* idcard` (required).
- 接口文档** (API Documentation): Contains tabs for **请求示例**, **成功响应**, **失败响应**, **错误码**, and **调用结果**. The **接口信息** (Interface Information) section includes:
 - 调用地址** (Invoke Address): `https://...`
 - 请求方式** (Request Method): GET
 - 返回类型** (Return Type): JSON
 - API 调用** (API Call): `API 签名` and `API 签名`
 - 获取认证** (Get Authentication): `AppKey & AppCode`
- 接口参数** (Interface Parameters): Contains sections for **请求参数 (Header)**, **请求参数 (Query)**, and **请求参数 (Body)**. The **请求参数 (Query)** section includes a table with the following data:

字段名称	必填	字段详情
name string	Y	姓名
idcard string	Y	身份证号码
